To Whom It May Concern:

The RectorSeal Corporation has manufactured specialty sealants in the United States for over seventy years. Our commitment to a safe environment and sustainability extends far beyond our manufacturing processes and traditional thinking. We provide products that meet NFPA 101: Life Safety Code® requirements and environmental standards.

RectorSeal's life safety products include the Metacaulk® and Flamesafe® firestop brands. These firestop products meet and exceed the requirements for the Leadership in Energy and Environmental Design (LEED®) Green Building Rating System™ accreditation point system. Our development practices, along with our high performance criteria and technical expertise, make us the leader in LEED projects that require firestop products. Our firestop products are manufactured and tested at our Houston, Texas facility, and we now have over 1,100 UL listed systems all meeting LEED requirements. We are dedicated to striving for a clean environment. We will continue our conscious efforts for a clean environment that started long before being "GREEN" was fashionable.

Our team of experienced and dedicated professionals is committed to continuous improvement in process and product and your success in firestopping projects.

If any questions or concerns arise, please feel free to contact RectorSeal at our Houston, Texas headquarters by dialing: 1-800-231-3345. Thank you for your business and support.

Sincerely yours,

RECTORSEAL

David M. Smith
